# Simply Smarter

[www.draegermedical.com](http://www.draegermedical.com)

Dräger introduces the Fabius GS™, a progressive new anesthesia system that will make anesthesia delivery easier for you.

The Fabius GS includes E-FLOW, a more ergonomic way of adjusting fresh gas flows and E-VENT, an intuitive and easy to use electrically driven ventilator. The combination of E-FLOW and E-VENT creates a simpler, smarter anesthesia system that provides the potential for significant cost-savings.

Explore [www.fabiussgs.com](http://www.fabiussgs.com) for more information about a simpler and smarter way of delivering anesthesia.
